

Yashvardhan Shashikant Borude

Competitive Programmer | Full Stack Developer

+91-7058230773 | [Email](#) | [LinkedIn](#) | [GitHub](#)

[Codeforces](#) | [LeetCode](#) | [HackerRank](#) | [CodeChef](#)

Professional Summary

Third-year Computer Engineering undergraduate (Batch of 2028) with strong foundations in data structures, algorithms, and software engineering. Experienced in building and deploying full-stack applications for real-world clients, with a focus on scalable system design and problem solving. Combines competitive programming rigor with hands-on development experience and is eager to contribute to large-scale software systems.

Education

Pimpri Chinchwad College of Engineering (PCCOE)

Pune, India

Bachelor of Technology in Computer Engineering

Exp. May 2028

- **Current Standing:** Entering Third Year (Sem 5) | **CGPA:** 8.86 (Till Sem 4)
- **Key Coursework:** Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Artificial Intelligence & Machine Learning, Generative AI.

Experience

Shivkush Hi-Tech Nursery

December 2025 – Present

Freelance Full Stack Software Developer

Ahilyanagar, Maharashtra

- **Frontend:** Bilingual (English/Marathi) mobile-first interface with responsive design, dark mode, glassmorphism UI, interactive 3D WebGL canvas (Three.js), and dynamic particle animations using Canvas API.
- **E-Commerce:** Complete shopping cart system, product catalog with category segmentation, checkout flow, and real-time order management with availability/booking status badges.
- **Backend & Admin:** Supabase (PostgreSQL) integration with Row-Level Security (RLS) policies, secure admin dashboard with CRUD operations, live inventory tracker, financial metrics, and gallery manager.
- **Advanced Features:** PWA support with Service Worker for installability, dynamic content management system for live news ticker, floating WhatsApp widget, 1-tap dialing, smart chatbot assistant, and OpenGraph/Twitter card SEO optimization.

Projects

PralayVeer - Disaster Preparedness System | SIH Hackathon

August 2024

- Front-end architecture for rapid-response disaster awareness platform during Smart India Hackathon (SIH) with strict accessibility standards for non-technical users during emergency scenarios.
- Collaborative Git/GitHub workflow delivering functional MVP within 24-hour deadline.

Startup Valuation Predictor | Python, Pandas, Scikit-Learn

October 2024

- Data analysis model estimating startup valuations using historical funding rounds and sector growth metrics with comprehensive ecosystem trend visualization.

Technical Skills

Languages: C++, JavaScript (ES6+), PostgreSQL, Python, HTML5, CSS3

Frontend: Three.js, WebGL, Canvas API, Vanilla JS, Responsive Design

Backend & Cloud: Supabase, Node.js, PostgreSQL, SQL, MongoDB, REST APIs, PWA & Service Workers

Tools: Git/GitHub, Linux, Tailwind CSS, Figma (Design Principles)

Core Concepts: Data Structures & Algorithms, OOP, System Design, UI/UX Design, Competitive Programming

Achievements

Competitive Programming Excellence: CodeChef 2-Star (Peak: 1434) | Codeforces Pupil (Max: 1227, 200+ Problems Solved) | HackerRank 5-Star (C++) | LeetCode 213+ Questions | 500+ Algorithmic Problems Solved focusing on graph theory, DP, greedy algorithms, and implementation.

NPTEL Certification: Scored 77/100 (Elite + Silver) in "Algorithmic Graph Theory and Data Structures" – a 12-week IIT-level course covering shortest paths, max-flow, and NP-completeness.

Paid Freelance Consultancy: Officially contracted by Shivkush Hi-Tech Nursery to architect and deploy modern web infrastructure for rural e-commerce platform (2025).

Smart India Hackathon (SIH): Delivered functional frontend MVP for disaster preparedness system within 24-hour competition timeline (August 2024).

Design Thinking & Innovation: Completed design thinking coursework with emphasis on identifying invisible systemic problems and iterating innovative product solutions through rapid prototyping.
